Implementation of the CEF  
eDelivery AS4 Profile across  
Europe

Co-financed by the Connecting Europe  
Facility of the European Union

# Objectives

The main goal of this Action is to promote the use of the eDelivery Digital Service Infrastructures amongst private and public entities by integrating the CEF eDelivery AS4 Profile messaging protocol in 6 Access Points by the implementing participants

# eIDAS regulation

Regulation EU N° 910/2014

This regulation seeks to enhance trust in electronic transactions in the internal market by providing a common foundation for secure electronic interaction between citizens, businesses and public authorities, thereby increasing the effectiveness of public and private online services, electronic business and electronic commerce in the Union.

# eDelivery

## Benefits of eDelivery\*

- Reduce the learning curve of service providers of document and data exchange networks.
- Accelerate the delivery time of a working document and data exchange network as eDelivery provides out of the box specifications and software components.
- Make savings in the cost of creating, maintaining and operating document and data exchange networks.
- Increase the quality of document and data exchange networks.
- Foster synergies at all levels with other service providers of eDelivery.
- As use increases, the wide availability of IT engineers with knowledge and experience in eDelivery's technical specifications is also expected to increase.

## Why standardization?

Standardization is a key factor of trade policy because it contributes to the removal of technical barriers to trade. Also it increases market access and international trade, and enhances cooperation at the international level. The use of the European Standard helps EU industry to access to global markets.
